

Michigan Construction Industry Mutual (MCIM) is a provider of workers' compensation insurance for businesses in the construction and manufacturing industries. Employers throughout Michigan - and more recently, Florida and Wisconsin - have found that we offer an exceptional combination of loss prevention education and training with competitive rates to increase safety and lower costs. While many companies make similar claims, **MCIM is service-driven**, measuring success on the ability to exceed customer expectations.

MCIM's partnership with home building associations provides policyholders in construction and other related trades with unprecedented value. Group incentives, preemptive safety systems, flexible payment plans, and cost containment programs are just a few of the reasons associations choose MCIM as their endorsed provider of workers' compensation coverage for their members.

National, state and local construction-related associations are recognized as voices of the building industry. Associations help their members advance by providing educational programs, networking opportunities, legislative representation, and group incentive plans. As a member, you can:

- Improve your skills by attending seminars, workshops and trade shows.
- Track legislative, regulatory, and judicial public policy decisions that impact your business.
- Broaden your contacts by networking, attending events, marketing and advertising.
- Improve operating performance by purchasing insurance, phone and payroll services, office supplies, automobiles and more with group incentives.

Builders, trade contractors, remodelers, suppliers, realtors and other associated businesses make up an association's diverse membership.

MCIM is endorsed by over 40 residential home building and commercial contractor associations. We support our business partners and require that all policyholders related to the construction industry be a member of one of these affiliated organizations.
